

• CALL FOR PAPERS

IEEE ICNP 2026 WORKSHOP

Network Infrastructure & Protocols for AI Agents

NIPA 2026

CO-LOCATED WITH
IEEE ICNP 2026
International Conference on
Network Protocols

PROCEEDINGS IN
IEEE Xplore
Double-blind peer review

WORKSHOP
DAY
**October 5,
2026**

LOCATION
**Tempe,
Arizona, USA**

SUBMISSION
DEADLINE
**June 26,
2026 (AoE)**

PAPER LENGTH
**Up to 6 Pages ·
IEEE Format**

ABOUT THE WORKSHOP

As AI evolves from isolated LLMs to collaborative multi-agent systems, the networking landscape faces an unprecedented paradigm shift. The **Internet of Agents (IoA)** envisions a distributed ecosystem where autonomous agents continuously communicate, negotiate, and synchronize — generating highly specific traffic patterns that challenge traditional network infrastructures. NIPA 2026 brings together researchers and experts from academia and industry to share the latest research, identify gaps, and define the roadmap for **agent-native networking**.

TOPICS OF INTEREST

- 01 High-performance network technology for agentic workloads
- 02 Congestion control for multi-agent synchronization
- 03 Hardware-software co-design for AI networking
- 04 Novel architectures for agent interconnection
- 05 Agent communication & collaboration protocols (MCP, A2A, ANP)
- 06 Semantic-aware and goal-oriented communication
- 07 P2P, client-server & hybrid agent network topologies
- 08 Adaptive workload partitioning across cloud and edge
- 09 Dynamic capability discovery and management
- 10 Dynamic task matching and workflow orchestration
- 11 Conflict resolution and multi-agent debate
- 12 Decentralized identity and access control
- 13 Defending against cross-agent threats
- 14 Privacy-aware architectures

IMPORTANT DATES

- | | | |
|--|--------------------------------|---------------------|
| | Paper Submission | Jun 26, 2026 |
| | Acceptance Notification | Jul 31, 2026 |
| | Camera-Ready Deadline | Aug 25, 2026 |
| | Workshop Day | Oct 5, 2026 |

All deadlines are Anywhere on Earth (AoE, UTC-12)

SUBMISSION GUIDELINES

- Original research, position papers, and early-stage work
- Up **6** in IEEE Computer Society format to **pages** (incl. references & appendices)
- Double-blind review — anonymize submissions; no author names or affiliations
- Unpublished work not under review elsewhere

SUBMIT AT

WORKSHOP CO-CHAIRS

HS **Haoyu Song**
Futurewei Technologies

ZQ **Zafar Ayyub Qazi**
LUMS

HX **Hong Xu**
CUHK
